

My Drawzit Snowman Directions

Student 3B

By: Carly

1. Go to Drawzit.com
2. The background color number should be #6699ff
3. Next, make one white ball at the bottom of the page that is 2 ½ inches for the bottom of the snowman.
4. Next, make another white ball that is 2 inches for the middle ball of the snowman.
5. Then, make one more white ball that is 1 2/16 inch for the head of the snowman.
6. Next, make 2 arms. First you must make sure your line size is at 16. Then, draw 2 arms that slightly go diagonal up and slightly touch the inside of the middle snowball. The right arm should be 1 ¾ inch. The left arm should be 1 ½ inch. Then when you are done with that make 2 sticks going out of the arm. Make the sticks on the right arm ¾ of an inch. On the left arm make the 2 sticks 12/16. (make sure that the color is brown)
7. Next go to the stamps and find the smiley face. Your size of the smiley face should be 5. Place the smiley face right in the center of the head snowball. Then you may go to your next step.
8. Next make 3 pink ball for its buttons. The 1st ball which is located at the top should be 1 centimeter high and 1 centimeter long. Then make 2 more buttons located where the bottom snowball and the middle snow ball meet.
9. Next make the hat. The hat should be like a top hat. The base of the hat should be 1 inch long and .3 of a centimeter in width (black for the outside-#000000 and the filling green-#33ff33) Then make the outside of the hat. Make 3 lines going up and across. Make 2 outside lines that are ½ inch apart, ½ a centimeter thick, and 2 centimeters long. Then make the top of the hat that is ½ centimeter thick and 2 centimeters long.
10. Next go to shapes click on the triangle. Then make it at size 4 and 14°f. It should be .3 of a centimeter tall and .7 of a centimeter long. Then place it below the eyes and above the mouth. Then you are done with that step.
11. Next you are going to make the red scarf. The first thing you need to do is go to the fill color and find the color # that is #cc0000. Then make a horizontal line that is 1 inch long and .3 of a cm thick. Next when you are done with that line then make a second line that is vertical, ½ an inch long, and is .1 of a centimeter wide. You are done with that step.
12. The last step is the snow (they are balls) The snow is going to be hard because I put a lot of them in different sizes and places. The first snowball is going to be 1 ½ centimeters away from the left side of the drawzit page and 5 ½ inches up from the bottom of the page. That same snowball should be ½ an inch wide and ½ an inch tall. The next ball should be exactly horizontal from the

first ball and should be 1 centimeter wide and 1 centimeter tall. Then make another ball that is horizontal from the first 2 and should be 2 centimeters wide and 2 centimeters long. Make 1 more ball at the top of the page that is exactly horizontal to the 3rd. That ball should be about $\frac{1}{2}$ an inch wide and $\frac{1}{2}$ an inch tall. Then we are going to make a tiny ball that is about 2 centimeters below the last ball at the top to the right. This one should be $\frac{1}{2}$ a centimeters wide and $\frac{1}{2}$ a centimeter tall. Next we have another one on the far left side of your paper on drawzit. This one should be $7\frac{1}{2}$ centimeters from the bottom of the page and about $2\frac{1}{2}$ centimeters from the left side of the page. It should be 1 centimeter wide and 1 centimeter tall. The next one should be exactly vertical from the one you just created. This one should be $1\frac{1}{2}$ centimeters wide and $1\frac{1}{2}$ centimeter tall. We only have 3 more. Then make one that is exactly diagonal down to the right from the one you just did. This should be $1\frac{1}{2}$ centimeter wide and 1 centimeter tall. The next one is going to be on the right side of you page. It is going to be 4 centimeters up from the bottom and $2\frac{1}{2}$ centimeters from the right side. This should be about $1\frac{1}{2}$ centimeter wide and $1\frac{1}{2}$ centimeter tall. One more. The last one should be exactly diagonal down to the right and 1 centimeter down from the one you just did. The last one should be 1 centimeter wide and 1 centimeter tall. You are now finally done!
